[ABOUT-US](#)[DEPARTMENT](#)[FACULTY](#)[RESEARCH](#)[PLACEMENT](#)[CONTACT-US](#)

## Research

Our engineering college has a strong focus on research and innovation. Our faculty members and students are involved in cutting-edge research projects in a wide range of areas, including:

- Artificial Intelligence
- Robotics
- Energy Systems
- Materials Science

**Artificial Intelligence**  
The Artificial Intelligence research group focuses on developing intelligent systems and algorithms that can reason, learn, and act autonomously.

- Machine learning
- Natural language processing
- Computer vision

**Robotics**  
The Robotics research group focuses on designing, developing, and controlling robotic systems for various applications, including manufacturing, healthcare, and space exploration.

- Manipulation and grasping
- Mobile robots
- Human-robot interaction

**Energy Systems**  
The Energy Systems research group focuses on developing sustainable energy sources and systems, as well as improving the efficiency and reliability of existing systems.

- Renewable energy
- Smart grids
- Energy storage

**Materials Science**  
The Materials Science research group focuses on understanding the structure and properties of materials at the atomic and molecular scale, and developing new materials with improved properties and functionalities.

- Nanomaterials
- Polymers
- Metallic alloys

## Placement

Our engineering college has an excellent track record in placing our graduates in top companies and organizations. Our graduates are highly sought after for their technical knowledge, problem-solving skills, and teamwork abilities. Some of the companies that have hired our graduates include:

- Microsoft
- Google
- Amazon
- Apple
- Intel

Our placement team works closely with our students to provide them with career guidance and opportunities. We also invite top companies to visit our campus for recruitment drives and job fairs. Our students have the opportunity to participate in internships, co-op programs, and industry-sponsored projects, which provide them with valuable hands-on experience and networking opportunities.

Placement Statistics

Year	Number of Students Placed	Percentage of Placement
2023	110	92%
2022	120	95%
2021	150	98%
2020	120	95%
2019	110	92%
2018	100	90%
